

Report – field campaign spring 2008 - climatology team

(May 12th – June 1st)

Participants on the spring 2008 field campaign:

- Roman Finkelburg, TU Berlin
- Marco Möller, RWTH Aachen University
- Dieter Scherer, TU Berlin
- Christoph Schneider, RWTH Aachen University

Associated colleagues:

- Matthias Braun, ZFL, University of Bonn
- Regine Hock, Geophysical Institute, University of Alaska, Fairbanks
- Fred Meier, TU Berlin

Objectives:

- Investigation of mass and energy balance of Vestfonna and De Geerfonna
- Meteorological measurements
- Assessment of spatial variability in local and regional climate setting
- Documentation and analysis of snow stratigraphy
- Obtainment of ground truth data for DTM generation
- Preparation for future assessment of ice dynamic information

Conducted fieldwork:

- Installation of 4 full energy balance automatic weather stations
 - 1 at the site of Kinnvika research station
 - KV-AWS
 - 3 on the NW ramp of Vestfonna (~240, ~370 and ~500 m asl)
 - VF-AWS240, VF-AWS370, VF-AWS500

- Installation of 2 automatic weather stations
 - 1 on De Geerfonna (~240 m asl)
 - DG-AWS
 - 1 on Ahlmann Summit (Vestfonna) (~605 m asl)
 - VF-AWS605
- Installation of an ablation stake network on De Geerfonna (6 stakes between ~210 and ~270 m asl)
- Installation of an ablation stake network on Vestfonna (15 stakes on the NW ramp between ~200 and ~550 m asl and 3 stakes on Ahlmann Summit at ~600 m asl)
- Differential GPS measurements
 - 1 ablation stake on De Geerfonna
 - 8 ablation stakes on Vestfonna
 - 2 kinematic profiles on De Geerfonna
 - 6 kinematic profiles alongside the NW ramp of Vestfonna and up to Ahlmann Summit
- Digging of 6 snow pits (1 at each of the AWS sites) for snow profile assessment (Temperature, snow density, grain size and grain type, snow stratigraphy)

LOG of activities:

Date	Workings	Weather	Site
10.05.2008	Arrival in LYR	Light wind, sunny, some clouds	LYR
11.05.2008	2 Heliflights to Kinnvika: Christoph, Roman, Equipment	Cloudy and foggy in LYR, sunshine in Kinnvika	Kinnvika/LYR
12.05.2008	2 Heliflights to Kinnvika: Marco, Dieter, Equipment; Skidoo exploration trip: Christoph, Roman	Sunny weather	Kinnvika
13.05.2008	Checking of transported equipment	Low clouds, completely overcast	Kinnvika

14.05.2008	Beginning of installation of the weather station in Kinnvika (KV-AWS); preparations for the ride to Ahlmann Summit	Cloudy in the morning, temporarily breaking-up in the afternoon	Kinnvika
15.05.2008	Further setup work on the weather station (KV-AWS); preparations for the ride to Ahlmann Summit	Windy and snowy	Kinnvika
16.05.2008	Finishing the weather station setup (KV-AWS); preparations for the ride to Ahlmann Summit	Sun in the evening	Kinnvika/Ahlmann Summit
17.05.2008	Arrival of additional Skidoo fuel with Helicopter; ride to Ahlmann Summit	Sunny, wind and snow in the evening	Ahlmann Summit
18.05.2008	Setup of the weather station at Ahlmann Summit (VF-AWS605)	Sunny weather	Ahlmann Summit
19.05.2008	Beginning of installation of the weather station in the north west ramp of Vestfonna near Wieselob (VF-AWS240)	Sunny weather	Ahlmann Summit
20.05.2008	Setup of weather station at the upper edge of the north west ramp of Vestfonna (VF-AWS500)	Sunny, deterioration in the afternoon, storm at night	Ahlmann Summit
21.05.2008	Recovering (sleeping, etc.)	Strom	Ahlmann Summit
22.05.2008	Dismounting of the Camp on Ahlmann Summit; finishing setup of weather station VF-AWS240; return to Kinnvika	Storm weakens	Ahlmann Summit/ Kinnvika
23.05.2008	Contact with polar bear; recovering (sleeping, etc.)	Cloudy and windy	Kinnvika
24.05.2008	Recovering (sleeping, etc.)	Cloudy and windy	Kinnvika
25.05.2008	Recovering (sleeping, etc.)	Cloudy and windy	Kinnvika

26.05.2008	Ride to De Geerfonna; setup of the weather station on De Geerfonna (DG-AWS); ride to the north west ramp of Vestfonna; setup of the camp	Overcast, foggy in places, increasing breaking-up or translucence of sun	Kinnvika/ north west ramp of Vestfonna
27.05.2008	Beginning to install a weather station in the middle of north west ramp of Vestfonna (VF-AWS370; trip to VF-AWS500 and Ahlmann Summit: Christoph, Roman	Cloudy and overcast	North west ramp of Vestfonna
28.05.2008	Finishing setup of VF-AWS370	Cloudy and overcast	North west ramp of Vestfonna
29.05.2008	Dismounting of the camp; trip to Franklinbreen; return to Kinnvika	Cloudy and totally overcast	North west ramp of Vestfonna/ Kinnvika
30.05.2008	Recovering (sleeping, etc.); round trip to Celsius Berget at midnight	Sun in the evening	Kinnvika
31.05.2008	Cleaning up Kinnvika Station	Sunny	Kinnvika
01.06.2008	Cleaning up Kinnvika Station; Heliflight to LYR: Roman, Marco, Christoph, Dieter	Sunny with some clouds	Kinnvika/LYR
02.06.2008	Recovering (sleeping, etc.)	Low clouds, temporary breaking-up in the late afternoon	LYR
03.06.2008	Recovering (sleeping, etc.)	Sunny	LYR
